Automatic Meter
Reading System

edasYs

State-of-the-art technologies for
your miniature control centre

Simply future-assured

edasYs, the automatic meter reading system for small-scale applications, lays the foundations for a new era. With its metering point oriented database like Windows Explorer environment and greatest ease of use, it paves the way to the future. edasYs provides connectivity for a wide range of meters.

In these fast-moving times, sophisticated administration often comes at a high price. The state-of-the-art technologies from Landis+Gyr minimise administrative effort, helping to reduce such costs. Convenient operation makes the administration of your customer data easy.

The rising demands of the liberalised electricity market make flexible and sometimes complex configurations a necessity. edasYs provides an excellent basis, and its simple and straightforward operation delivers the best possible support for data acquisition, evaluation and circulation. Its sophisticated scheduler sets the pace. edasYs picks up where other AMR systems just seem too massive. This becomes apparent from the moment of installation, which is quick and effortless.

The metering points can be managed on a Windows-based user interface. The operating steps are self-explanatory and quickly become second nature – particularly the process of adding and managing new metering points becomes highly efficient. All information is structured clearly and unambiguously.

The competitive price and balanced functionality suit any budget. Finally a system is available that doesn't make too many demands on your hardware.

Manage energy better

We deliver peace-of-mind when it comes to managing your energy. Decades of leadership in technology and in-depth knowledge at Landis+Gyr means we are able to offer you an extensive, high quality and proven portfolio.

Obtaining the highest level of energy efficiency has never been easier. We have translated our unique expertise of utility processes into integrated energy management solutions and we can help you streamline your processes, increase customer loyalty and secure revenue.

Let us tailor our innovative solutions to meet your specific needs. Whether electricity, water, heat/cold, gas metering or load management, we provide what you need to ensure that your energy is managed with increased precision and reliability.

With Landis+Gyr as your trusted partner, you can manage energy better.
