**meter2cash www100
Internet Information System**

Utilities Interest in the Internet is high

- 62% believe it will be critical to their futures
- 1,200 Utility hosted sites expected in USA by end 1998
- Neighbouring “dream” segments have already demonstrated the value - it has become a “must have” for modern utilities
- Realisation barriers and cost expectations are low

But application know-how poor

- 58% of Utilities see the internet simply as a channel to promote services and products
- Less than 20% believe it will lower the costs of account management
- Having a “home page” is the goal

However

- Neighbouring segments and leading utilities are already understanding the real benefits of an interactive Internet presence

The Overall Picture - More than just a Home Page

End User Reporting

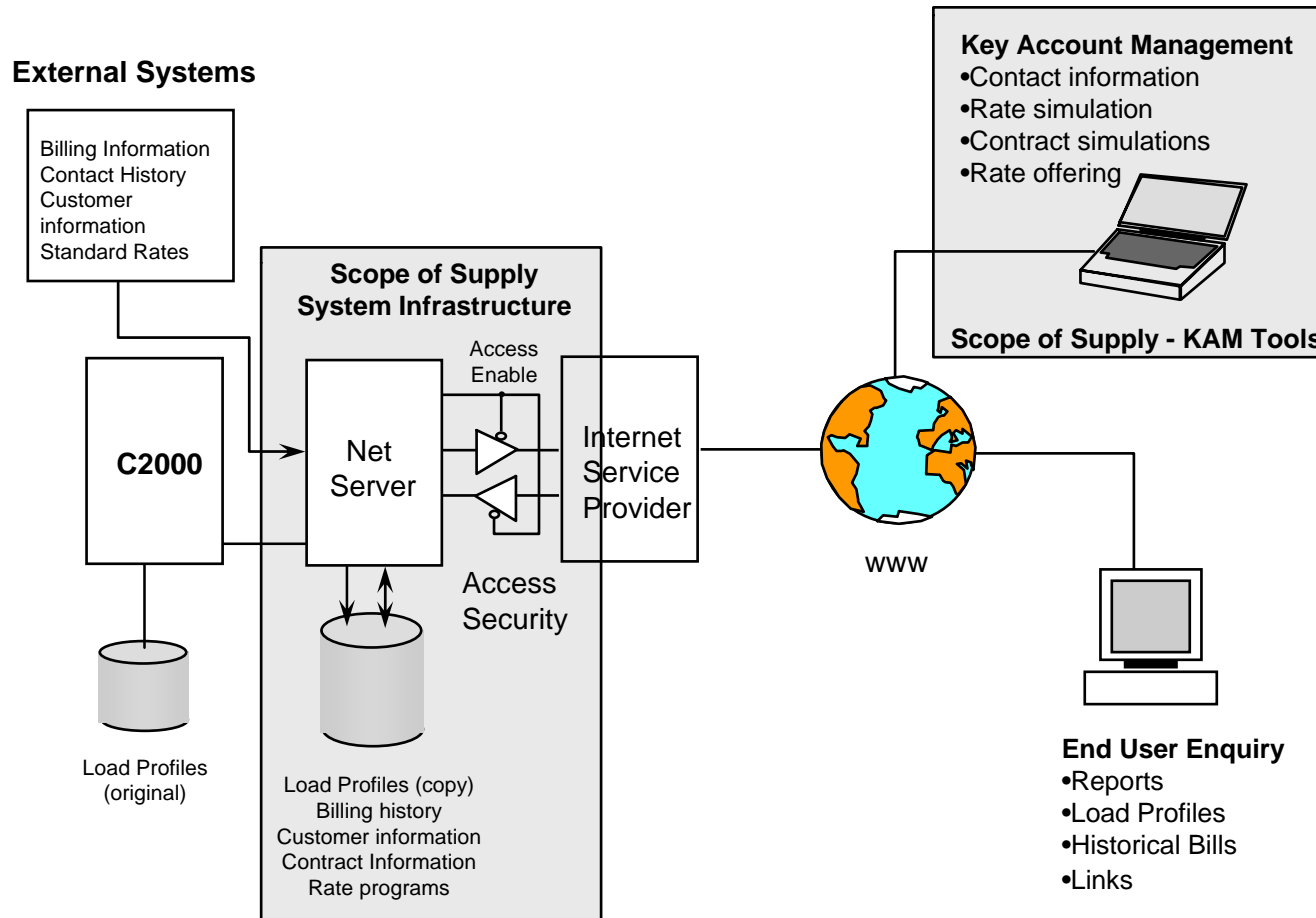

- Provides data to the end user in a simple format
- Enables the customer to understand his profile
- Enables the Utility to “communicate” via the Internet

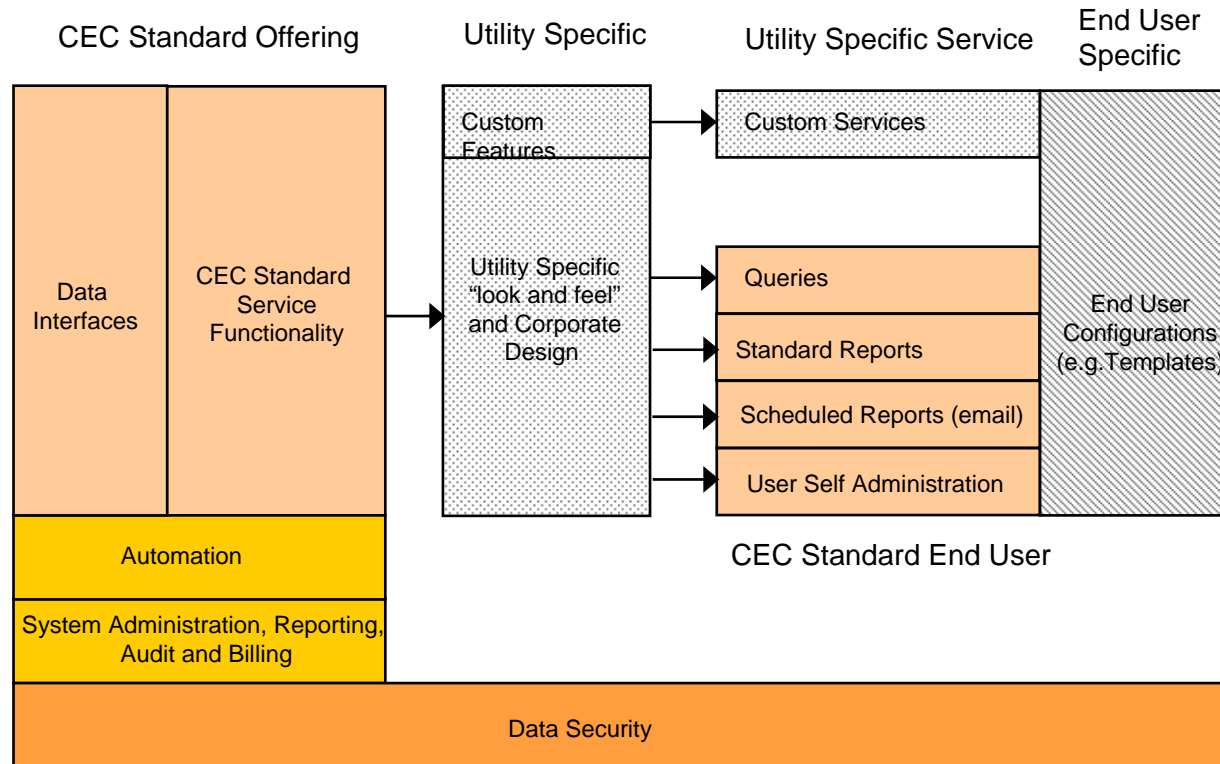

Key Account Management

- Enables remote KAM activity via low cost open channel
- Supports visualisation and simulation tools to aid the sales process
- Allows KAM to have access to the most up to date information for effective selling

Meter Data Service

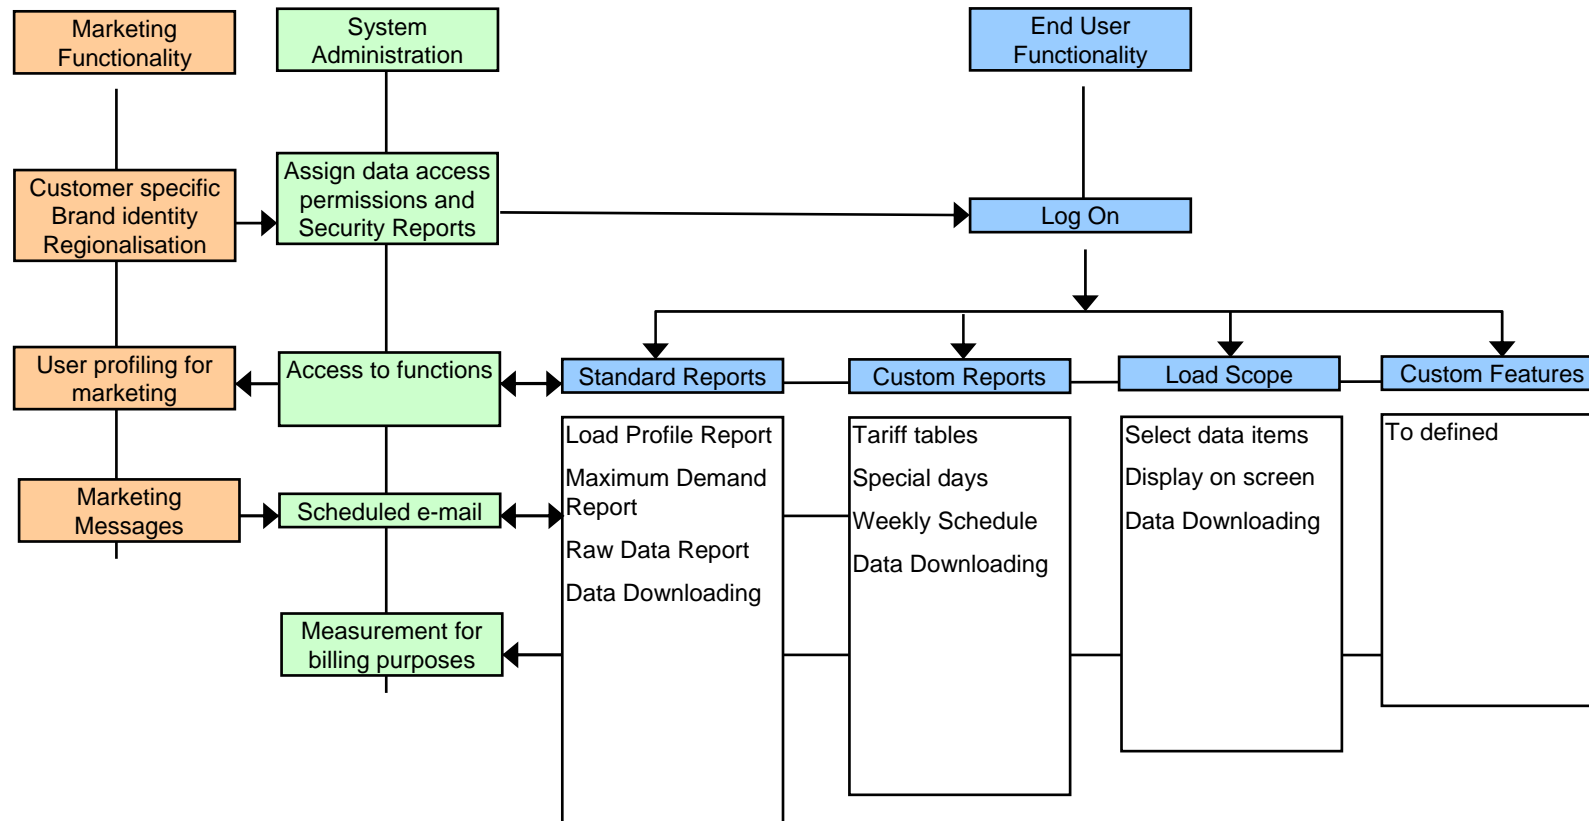

- Provides for new MDAA requirements

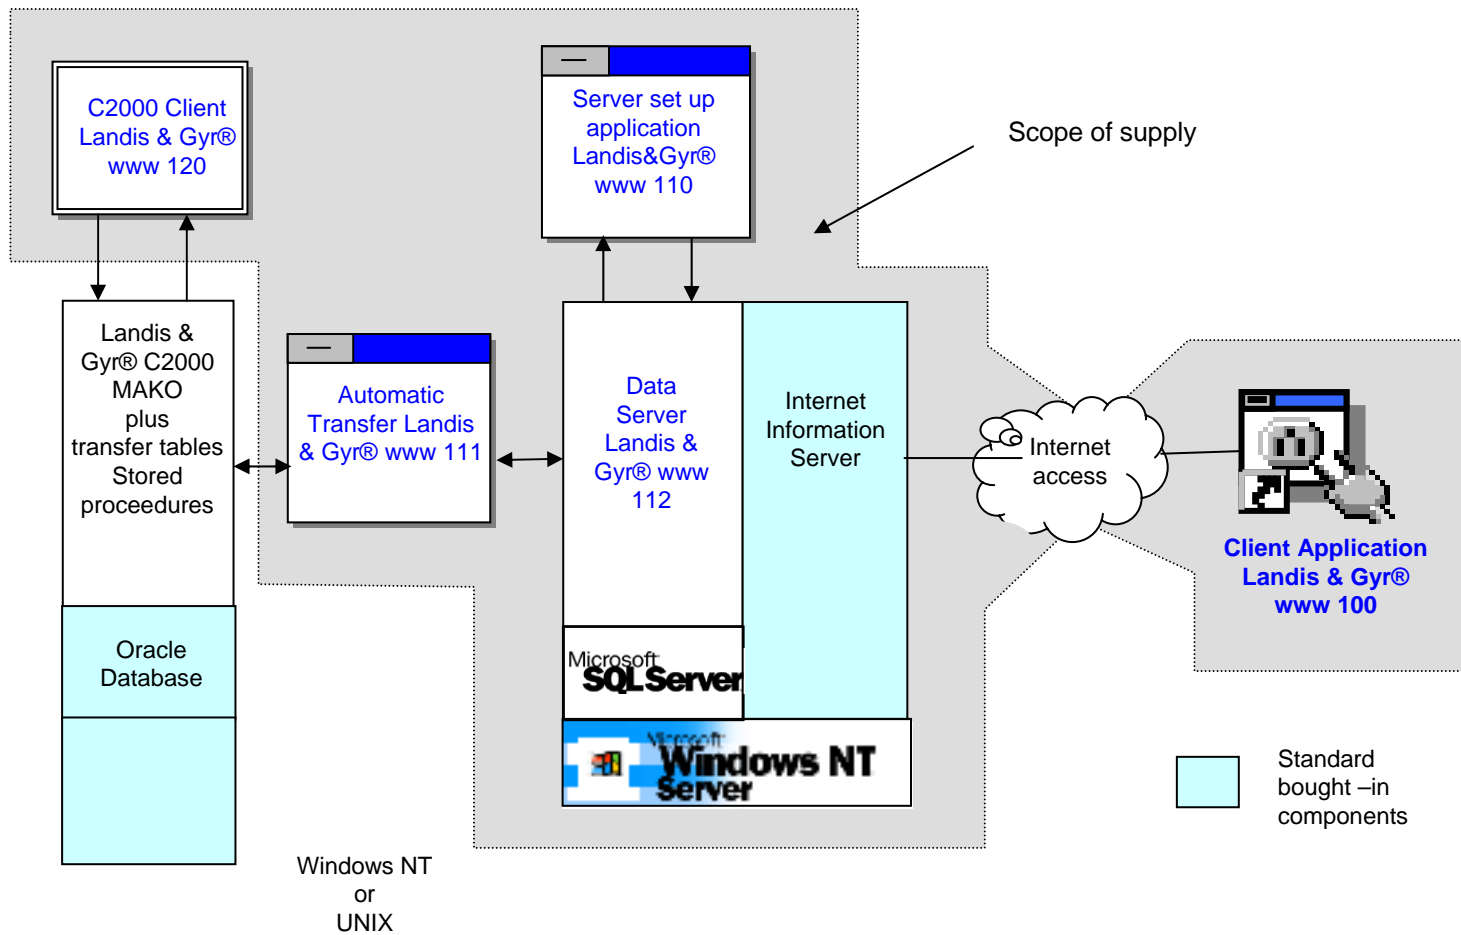

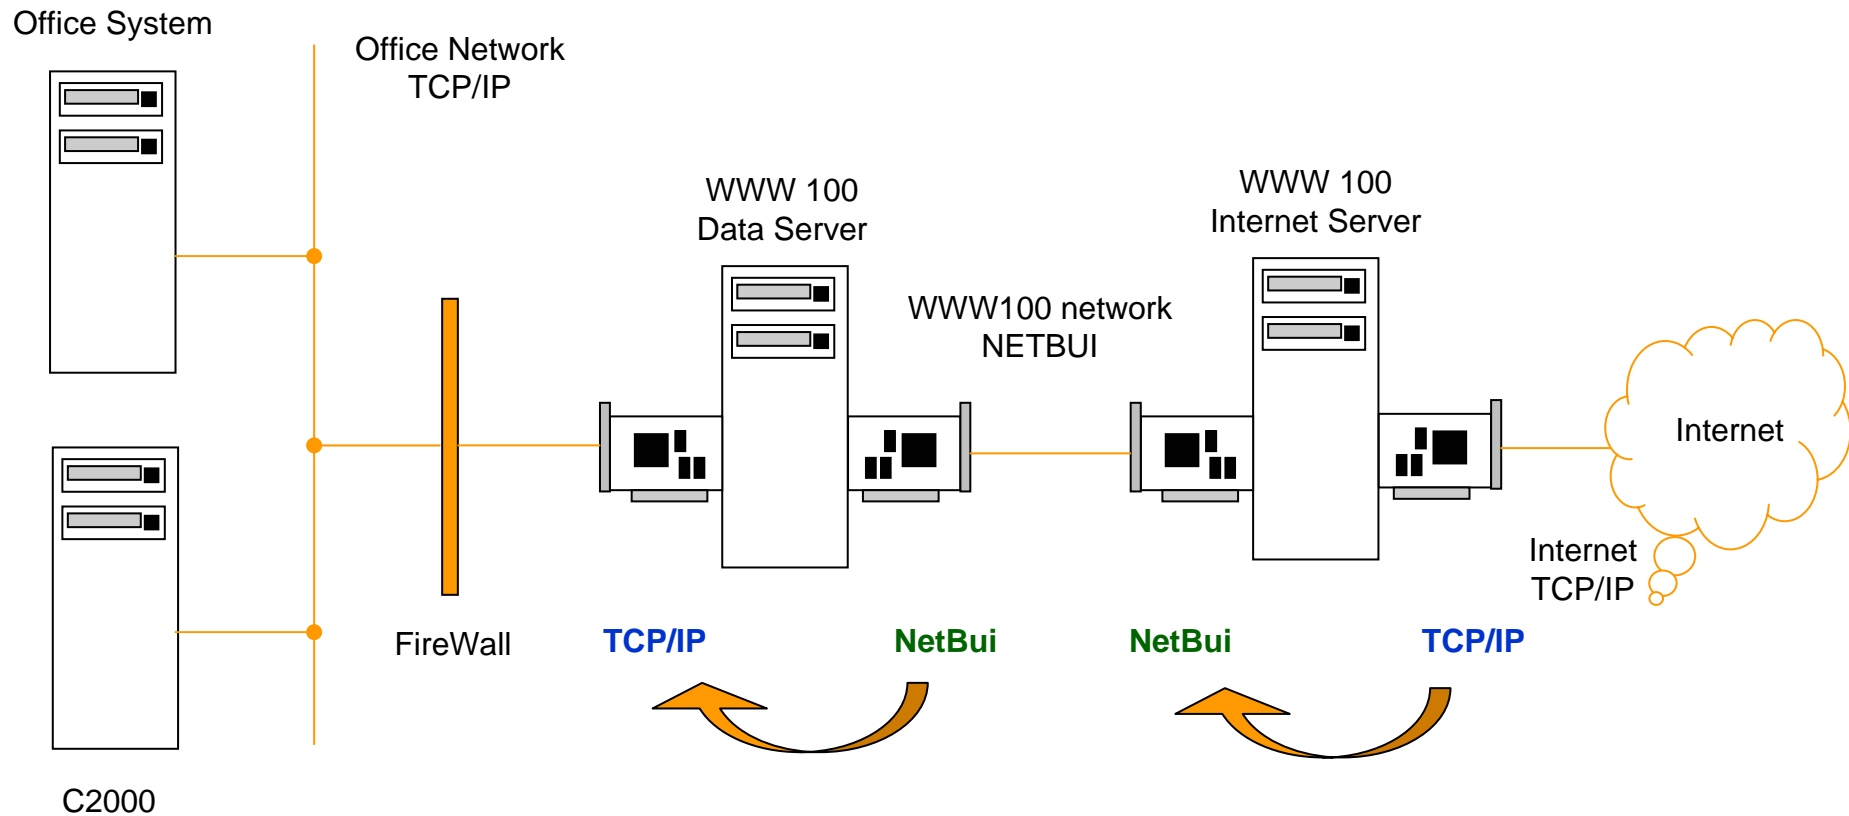

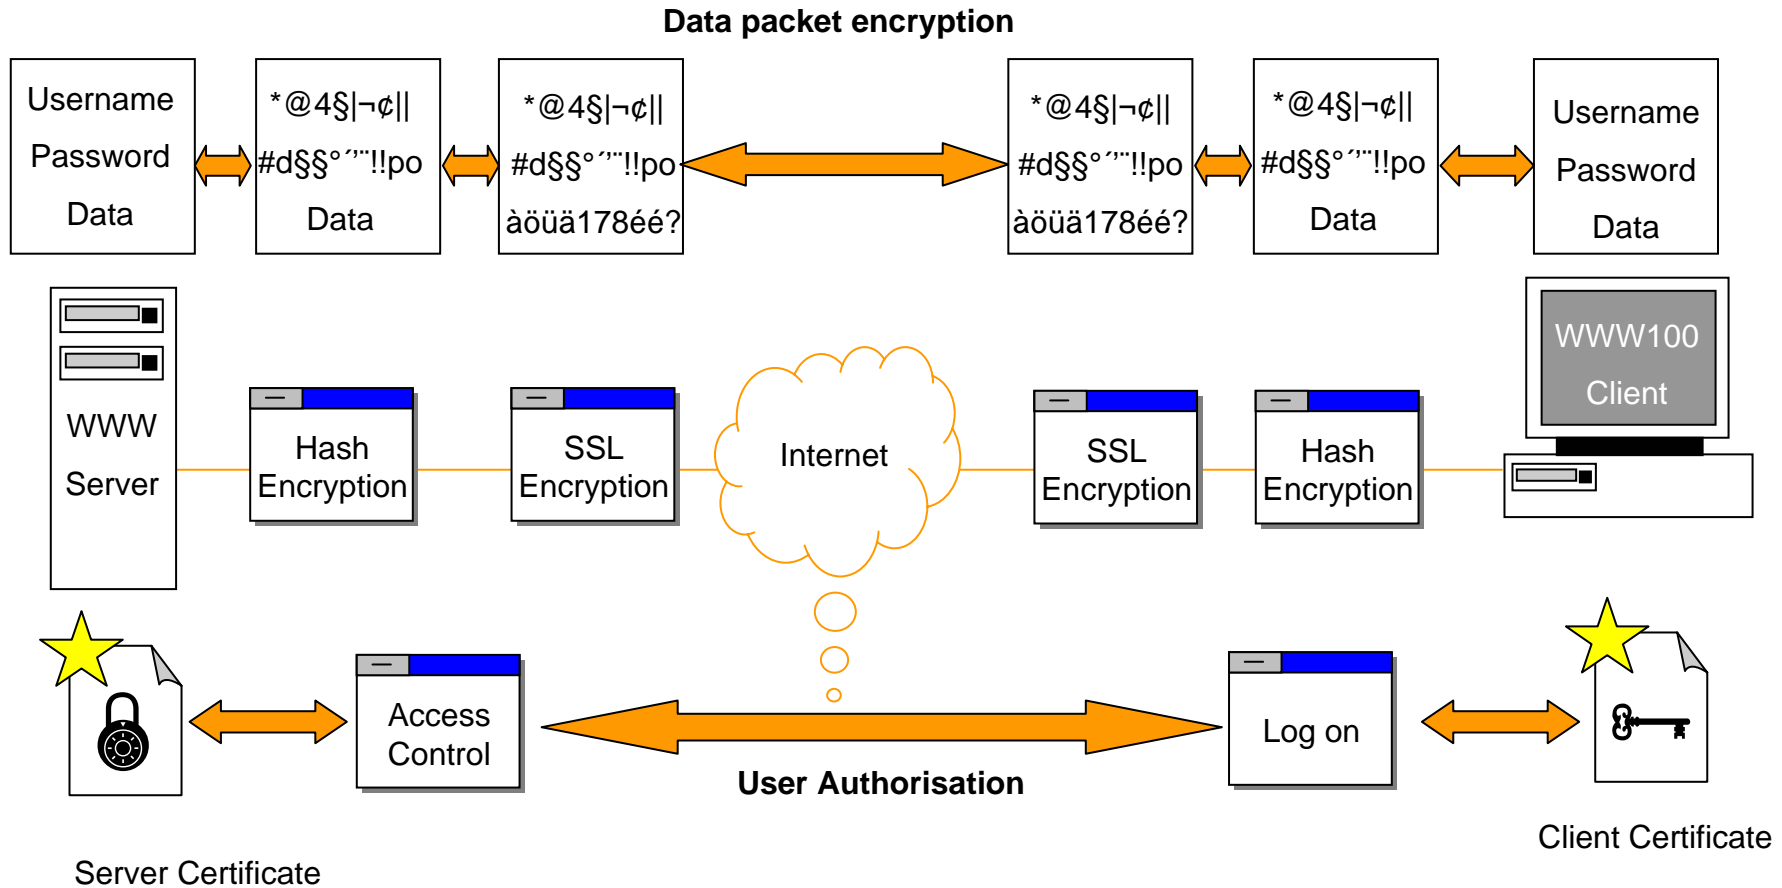

From front office to back office - the total solution

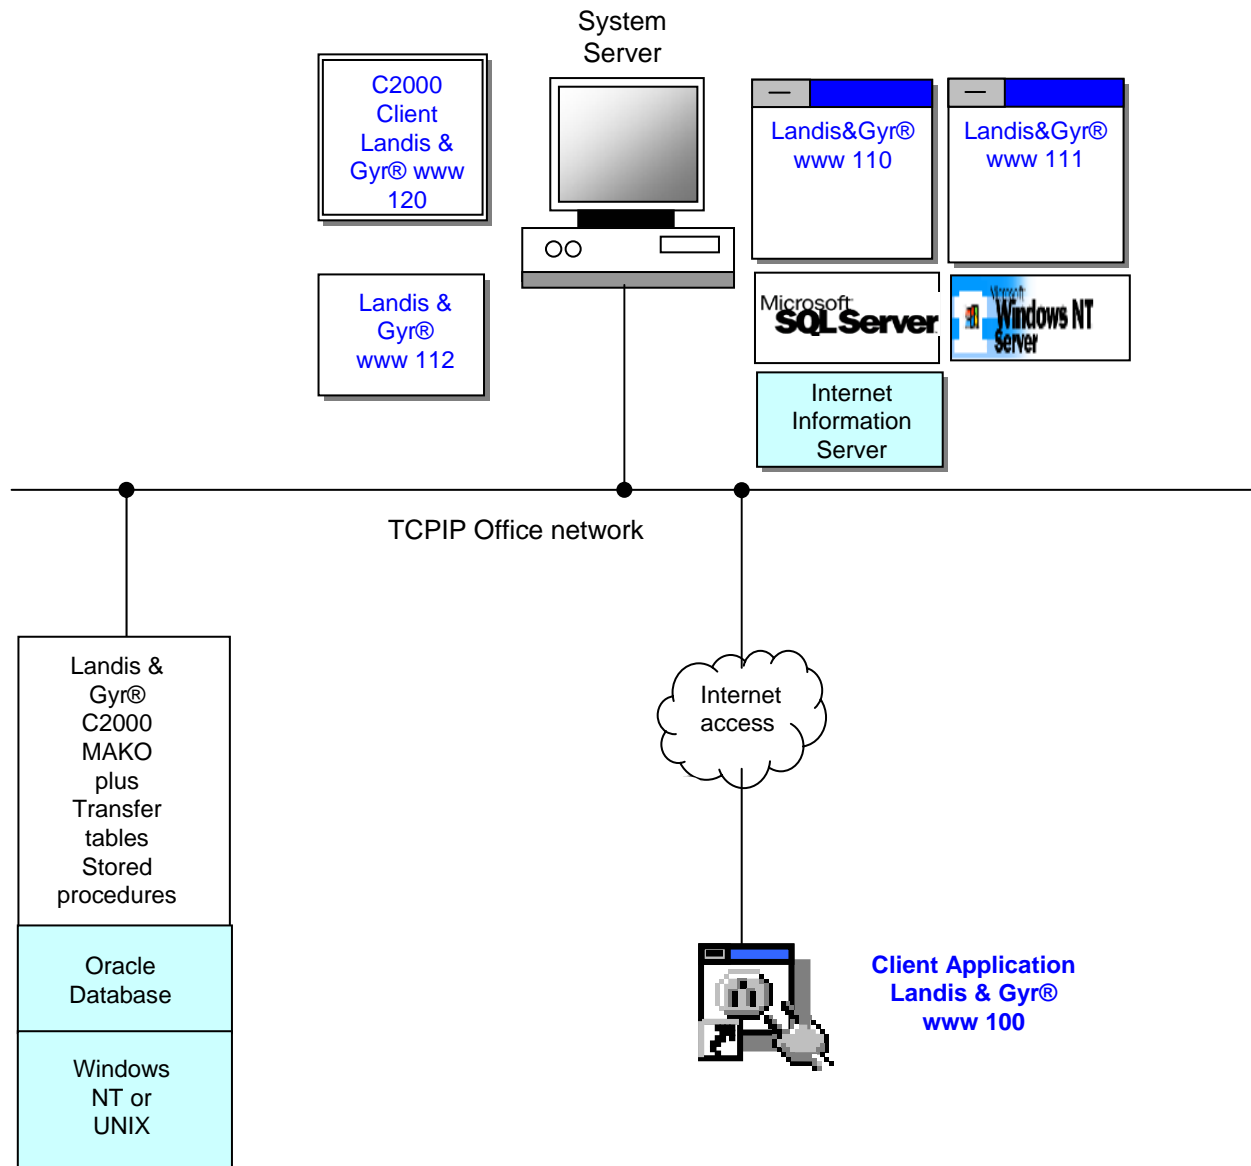

Protocol translation stops TCP/IP packets from the Internet reaching the office network

Delphi Client application and executables

Fast to develop

Extensive range of components available

Enables very rapid GUI prototyping enabling early customer presentations

Stable

Microsoft™ Standards

Windows NT V4.0, SQL Server, Internet Information Server

Industry standard and available world wide

Rapidly developing know-how base

Will continually improve

Platform

Pentium PC just gets better and better

System Software

www.100 end user reporting application

www.111 automatic transfer application

www.110 server set up application

www.112 data server script and procedure pack

Hardware Specification

Pentium II 400MHz Plus

256MRAM

4.3GB disk for OS

18+GB disk for profile data

Display, keyboard etc

DAT drive 12/24GB

Software

SQL server V6.5 +
